

JSS 1 DIGITAL TECHNOLOGIES – FIRST TERM

TOPIC 1: INTRODUCTION TO DIGITAL TECHNOLOGY

1. Meaning of Digital Technology

Digital technology refers to electronic tools, systems, devices and resources that generate, store, process or transmit data in digital form (as binary digits – 0s and 1s). It includes computers, smartphones, the internet, software and digital media.

2. Importance in Modern Life

- Communication – calls, messages, social media, email
- Education – e-learning, online research, educational apps
- Business and banking – online shopping, mobile money, e-commerce
- Health – medical records, telemedicine, diagnostic equipment
- Entertainment – streaming, games, digital music and films
- Government services – e-governance, online registration
- Daily convenience – navigation, weather apps, smart devices

3. Examples of Digital Devices

- Computers (desktop, laptop, tablet)
- Smartphones and mobile phones
- Tablets and e-readers
- Smart televisions and digital cameras
- Printers, scanners and projectors
- Wearable devices (smart watches, fitness trackers)
- Game consoles and digital audio players

4. Summary

Digital technology uses electronic systems that work with data in digital form. It is essential in communication, education, business, health and entertainment. Common devices include computers, phones, tablets and smart gadgets.
