

## TOPIC 8: MS WORD (INTRODUCTION)

### 1. What is MS Word?

Microsoft Word is a word-processing application used to create, edit, format and print text documents such as letters, notes, reports and essays. It is part of the Microsoft Office suite.

### 2. Opening, Saving and Editing Documents

- **Open Word** – from the Start menu or desktop shortcut.
- **Create a new document** – Blank document.
- **Type and edit** – use the keyboard; use Backspace/Delete to correct mistakes; use arrow keys or mouse to move the cursor.
- **Save** – File → Save or Ctrl + S; choose location and file name; default type is .docx.
- **Save As** – to save a copy with a new name or location.
- **Open an existing document** – File → Open.

### 3. Formatting Text

- Change font type, size and colour (Home tab).
- Bold (Ctrl + B), Italic (Ctrl + I), Underline (Ctrl + U).
- Alignment: Left, Centre, Right, Justify.
- Line spacing and paragraph spacing.
- Bullet points and numbered lists.

### 4. Inserting Pictures

- Insert → Pictures → select image from computer or online.
- Resize and move the picture; use Wrap Text options so text flows around it.

### 5. Page Setup and Printing Basics

- Layout / Page Setup – margins, orientation (Portrait/Landscape), paper size (A4).
- Insert page numbers and headers/footers if needed.
- File → Print (or Ctrl + P) – choose printer, number of copies, pages to print; use Print Preview first.

### 6. Summary

MS Word is used to create and format text documents. Learn to open, type, edit, save, format text, insert pictures, set up the page and print. These skills are useful for school work and future office tasks.
