

TOPIC 3: GRAMMAR – VERBS AND ADJECTIVES

1. Verbs

A verb is a word that shows action or state of being. Examples: run, write, is, become.

Types:

- **Transitive** – takes an object (She *kicked* the ball).
- **Intransitive** – does not take an object (He *slept*).
- **Regular** – past tense ends in -ed (walk → walked).
- **Irregular** – change form (go → went, eat → ate).
- **Auxiliary (helping)** – be, have, do, will, can, etc.
- **Lexical (main)** – the main action verb in a sentence.

2. Adjectives

An adjective describes or modifies a noun or pronoun (big house, happy child, three books).

Comparison of adjectives:

- Positive: tall
- Comparative: taller (than)
- Superlative: tallest (the)

Some use more/most (beautiful → more beautiful → most beautiful). Absolute adjectives (e.g. unique, perfect) are not normally compared.

3. Summary

Verbs show action or state; adjectives describe nouns. Correct use of types and comparison makes sentences clear and accurate.
