

JSS 1 ENGLISH STUDIES – FIRST TERM

TOPIC 5: READING AND COMPREHENSION

1. Language Skills (LSRW)

The four basic language skills are Listening, Speaking, Reading and Writing. Reading helps you gain information, enjoy stories and improve vocabulary.

2. Reading Strategies and SPQ3R

SPQ3R (or SQ3R) is a study method: **Survey** (look over titles and headings), **Preview/Question** (ask what you want to learn), **Read**, **Recite/Recall** (say key points in your own words), **Review**. It improves understanding and memory.

3. Main and Supporting Ideas

The main idea is the central point of a paragraph or passage. Supporting ideas give details, examples or reasons that explain the main idea. Learn to identify both when answering comprehension questions.

4. Levels of Comprehension

Ask questions at different levels: who, what, where, when (literal); why, how (interpretive); and opinion or prediction (projective). Always support answers with evidence from the passage.

5. Vocabulary

Build vocabulary from texts about family, school subjects and daily life. Use new words in sentences and note meanings in context.

6. Summary

Good reading uses strategies like SPQ3R, distinguishes main from supporting ideas, and answers questions at literal, interpretive and opinion levels.
