

TOPIC 8: DRAWING

1. Meaning of Drawing

Drawing is the art of creating pictures or designs using lines, marks and tones on a surface, usually paper. It is fundamental to almost all visual arts and is used for planning, expression and finished works.

2. Types of Drawing

- **Still-life drawing** – objects arranged and drawn from observation
- **Nature drawing** – plants, animals, landscape
- **Figure / life drawing** – the human form
- **Imaginative / memory drawing** – from imagination or memory
- **Technical / geometric drawing** – precise plans and diagrams

3. Materials and Media

Pencils (HB, 2B, 4B, etc.), charcoal, pen and ink, crayons, pastels, markers, paper of suitable quality, eraser and sharpener. Choose media to suit the purpose and desired effect.

4. Shading Techniques

- **Hatching** – parallel lines
- **Cross-hatching** – crossed lines
- **Stippling** – dots
- **Blending / smudging** – smooth transitions of value
- **Scribbling** – free, loose marks

Shading creates the illusion of form, light and depth.

5. Purpose of Drawing

To record observation, develop ideas, communicate design, express emotion, practise hand–eye coordination, and produce finished artworks. Drawing is a core skill for every art student.

6. Summary

Drawing uses line and tone to represent the world or the imagination. Types, materials and shading techniques give the artist many ways to observe, plan and create.
