

TOPIC 1: REVIEW OF JSS 1 WORK

1. Hardware

Hardware is the physical parts of a computer: input devices (keyboard, mouse), output devices (monitor, printer), processing (CPU), storage (hard disk, SSD, flash drive) and system unit components.

2. Software

Software is the set of instructions that tell the hardware what to do. System software (e.g. operating system) manages the computer; application software (word processor, browser, games) performs specific tasks for the user.

3. Online Safety (Recap)

- Do not share passwords or personal details with strangers.
- Use strong passwords and keep them private.
- Be careful what you post online; think before you click.
- Report cyberbullying and suspicious messages.
- Avoid downloading files from untrusted sources.

4. Summary

Hardware and software work together. Online safety habits learned in JSS 1 remain essential as you study networks and the internet in JSS 2.
