

TOPIC 2: PARTS OF SPEECH

1. Nouns

A noun names a person, place, thing or idea. Types: common, proper, concrete, abstract, countable, uncountable, collective. Functions: subject, object, complement.

2. Pronouns

Pronouns replace nouns (I, you, he, she, it, we, they; me, him, her; mine, yours; this, that; who, which). Agree in number and person with the noun they replace.

3. Verbs

Verbs express action or state. Main verbs and auxiliary verbs (be, have, do, modals). Regular and irregular forms. Transitive verbs take an object; intransitive do not.

4. Adjectives

Adjectives describe nouns (big, red, interesting). They can show degree: positive, comparative, superlative (tall, taller, tallest).

5. Adverbs

Adverbs modify verbs, adjectives or other adverbs (quickly, very, well). Many end in -ly. They answer how, when, where, how often.

6. Other Parts of Speech

Prepositions (in, on, at, by); Conjunctions (and, but, because, although); Interjections (Oh!, Wow!).

7. Summary

Knowing the parts of speech helps you form correct sentences and analyse language. Practise identifying them in passages.
