

TOPIC 9: SUMMARY WRITING

1. Meaning of Summary

A summary is a short version of a longer text that contains only the main ideas, written in your own words. It is shorter than the original and omits examples, repetition and minor details.

2. Steps in Summary Writing

1. Read the passage carefully for full understanding.
2. Identify the main idea of each paragraph or section.
3. Underline or list key points; ignore illustrations and digressions.
4. Write the summary in continuous prose (or as directed) using your own words.
5. Keep to the required length; check that nothing essential is missing and nothing extra is added.

3. Useful Tips

- Do not copy whole sentences from the passage unless quoting briefly is allowed.
- Use linking words so the summary reads smoothly.
- Maintain the original meaning; do not add your opinion.
- Practise reducing paragraphs to one or two sentences.

4. Summary

Summary writing tests understanding and the ability to select and condense information. Follow a clear process: read, select main points, rewrite briefly in your own words.
