

JSS 2 TRADE SUBJECT – FIRST TERM

BEAUTY AND COSMETOLOGY

1. Review of Basics

Cosmetology is the professional care of hair, skin and nails. Hygiene, client consultation and safe use of products and tools are fundamental. Personal grooming and a clean workspace create a professional image.

2. Hair Care and Simple Styling

Understand hair types and basic care (washing, conditioning, detangling). Practice simple styles appropriate to client preference and hair condition. Use tools (combs, brushes, dryers) correctly and safely. Avoid harsh chemicals without proper training.

3. Skin Care Basics

Cleanse, tone and moisturise as basic steps. Identify simple skin types (dry, oily, combination, sensitive) and choose suitable products. Emphasise sun protection and not sharing personal items that contact the skin.

4. Nail Care (Manicure Basics)

Shape nails, care for cuticles, apply polish neatly. Sterilise or disinfect tools between clients to prevent infection. Dispose of waste properly.

5. Safety and Professional Conduct

Patch-test new products when advisable; never work on infected or broken skin without referral; keep records of services; be punctual, polite and confidential with client information.

6. Entrepreneurship

Cost products and time; set fair prices; promote services honestly. A small home or salon-based service can grow with skill, hygiene and good customer relations.

Summary

JSS 2 Beauty and Cosmetology develops practical hair, skin and nail care skills with strong emphasis on hygiene, safety and professional behaviour.
