

TOPIC 4: MEANING AND USE OF MOTIFS (PART 2)

1. Creation of Motifs from Nature and Imagination

Observe leaves, animals, architecture and everyday objects; simplify shapes into clear motifs. Imagination allows abstract and original designs. Sketch many variations before choosing a final motif.

2. Repeat Patterns

Repeat motifs in rows, grids, rotations or reflections to create all-over patterns. Plan spacing so the design is balanced and not overcrowded.

3. Transfer of Motifs on Paper or Fabric

Methods include tracing, stencilling, block printing, freehand drawing and digital transfer (where available). On fabric, consider colour fastness and suitability of the medium (dye, paint, embroidery).

4. Summary

Create motifs from observation and imagination; organise them into repeat patterns; transfer them carefully onto paper or fabric for finished designs.
